

NOW OFFERING CTS DRIVE —

# private, secure offsite storage

CTS Ethernet Offsite On-Net Storage

**CTS**  
TELECOM INC.

community based – worldwide

[CTSTELECOM.COM](http://CTSTELECOM.COM)

13800 E. MICHIGAN AVE., GALESBURG, MI 49053-9658

CTS is now offering **CTS Drive** – private, secure offsite storage to backup and store your data. CTS Drive is delivered via a dedicated 1G burstable Ethernet Private Line (EPL) or a MetroE connection on your CTS Fiber.

- Capacities are available at varying share levels to fulfill your storage requirements.
- Buy storage as you need it. No capital investment.
- Unmetered bandwidth in and out of storage. Upload and download your data as necessary at no additional cost.
- Redundant RAID6 disc array located in the CTS Data Center.
- Supports Windows, Linux and Apple server and desktop operating systems.
- Your data is isolated via multiple layers of virtualization technologies.
- Storage is accessible via Windows Share (SMB or CIFS).
- Active Directory Integration is available for an additional fee.
- CTS Telecom is a local provider. In the event of a catastrophic emergency at your business, your data can be delivered to your site on a portable hard drive.
- Southwest Michigan businesses on CTS Fiber Ethernet can directly access CTS Drive.
